Lahore, Pakistan

SUMMARY

Versatile Senior Software Engineer boasting 5+ years of experience in full-stack and cloud development, adept at translating ideas into impactful, user-centric solutions. Known for enhancing collaboration between engineering and product teams, and dedicated to fostering an environment of continuous learning and innovative solution-building.

PROFESSIONAL EXPERIENCE

[ThirdElevation](#), (Remote) Brooklyn NY, USA

Senior Backend Engineer | August 2023 — Present

- **Image Analysis Tool for Digital Marketing (MVP)**
Technologies: Python, FastAPI, OpenCV, Scikit-learn, Github Workflows, Pydantic, Pytest
Developed a Python-driven MVP, utilizing image processing to extract insights for enhancing brand image conversions on ad platforms.
- **Go Contact Form Functions**
Technologies: GoLang, DigitalOcean SLS & Functions, Mailgun, Go SQL Driver
Engineered serverless contact form functions, enhancing user traffic management and providing refined control to the email marketing team.
- [Luxel Portal](#)
Technologies: Django Rest Framework, Express.js, AWS S3, Lambdas, PostgreSQL
Addressed API bugs, ensuring smooth management of processes and materials catalog.
- **Kafka Streams with Join (POC)**
Technologies: Spring Boot, Hibernate, Gradle, Spring Data JPA, Spring Kafka, MySQL
Developed a data joining solution using Kafka Streams, ensuring efficient data publishing across topics.

[Realleads](#) Inc, (Remote), Kansas, USA

Senior Software Engineer | January 2021 — August 2023

- [SKUWorld App](#)
Technologies: Angular, C#, .NET Core, Azure Blob Storage, Azure SQL, Vue.js, Vuetify
Led the upgrade of SKU World, enhancing UI and developing robust back-end APIs, while also creating a lightweight field mapping extension.
- [HHA Exchange Portal](#)
Technologies: Angular, ASP.NET Core, Transact-SQL, ScriptDom, Dapper, GitHub
Facilitated the migration of legacy healthcare systems, optimizing database interactions and ensuring smooth data migration and system functionality.

- [SellifyCRM](#)

Technologies: AWS Lambda, API Gateway, Cognito, SQS, SES, Next.js, AWS SAM

Developed a CRM system on AWS Serverless architecture, optimizing workflows for over 10,000 sales agents.

- [TaxBox](#)

Technologies: .NET Core, Elasticsearch, AWS S3, MSSQL Server, Next.js, TypeScript

Developed a specialized search engine and designed a subscription process integrated with Stripe.

[ResourceInn, Lahore, Pakistan](#)

Application Development Consultant | February 2022 — March 2022

- **ResourceInn HRMS**

Assisted in the migration and upgrade of the backend server built on Laravel.

[Geekinn, Lahore, Pakistan](#)

Senior Software Engineer | July 2020 — January 2021

Software Engineer | July 2019 — July 2020

- **Real Estate Marketplace App (USA and Canada)**

Technologies: Node.js, Laravel/Lumen, Java Spring Boot, AWS, BitBucket, GitLab, Lerna, Nuxt.js, Vue.js, Vuex, PHP, GraphQL, C#, ElasticSearch

Engineered micro-services and migrated an Angular-based app to Next.js, enhancing performance and UI/UX.

- **Property Validator Tool**

Technologies: Vue.js, Vuex, Laravel, MySQL, PostgreSQL, Elasticsearch, SSH, GraphQL

Developed a Property Validator Tool, integrating multiple data sources and ensuring comprehensive information management.

[GreyNeon, Lahore, Pakistan](#)

Junior Software Engineer | May 2019 — July 2019

- **Order-Taking App**

Technologies: Laravel, AWS, BitBucket, Vue.js, Vuex, MYSQL, Ionic

Engineered a location-based promotions feature and integrated Google Maps API within Vue.js for dynamic location assessment. Developed a real-time menu interface, introduced the "My Bowl" feature for meal customization, and designed an Admin Portal for operational management. Implemented Saga Orchestrator for Order and Payment Services.

Education

- BSc (Hons) Computer Sciences | [University of Engineering and Technology Lahore](#)

Extracurricular

- Technical Blog Writing | [Medium](#) (April 2023 — Present)
- Table Tennis | Local Community Clubs (January 2016 — Present)
